Reviews
Reiko Fujita: Construction of Indolizine Framework ........................................... 1

Originals
Shigenori Suzuki and Yasuyuki Endo:
Studies on the Constituents of the Fruits of Paederia scandens. ................................. 17
Structure of a New Iridoid, Paederia lactone .................................................. 17
Keiko Yamada, Wakako Hannda, Masao Nagaoka, and Mituteru Numazawa:
Study of Aromatase-Catalyzed Metabolic Switching of 2,2-Dimethylandrostenedione:
Synthesis of Possible Metabolites and Their Inhibitory Activities of Aromatase ............. 23
Masato Chida, Yasunori Yoaita, and Masao Kikuchi:
Constituents of Mushrooms. XXII. Methylation of Russulanorol,
a Norsesquiterpenoid Isolated from the Fruiting Bodies of Russula delica,
with Trimethylsilyldiazomethane ...................................................................... 31
Yasunori Yoaita and Masao Kikuchi:
Constituents of Mushrooms. XXIII. Conformational Analysis and Absolute Structure of
Lactarorufin B, a Sesquiterpenoid Isolated from the Fruiting Bodies of Russula delica ...... 35
Erika Matsuoka, Koichi Machida and Masao Kikuchi:
Studies on the Constituents of Hypericum Species. I.
On the Chemical Constituents of Hypericum erectum Thunb. .................................... 41
Masafumi Kikuchi and Masao Kikuchi:
Studies on the Constituents of Swertia japonica Makino III.
On the Triterpenoids and Phenol Glucoside ...................................................... 49
Reiko Fujita, Sota Wakayanagi and Hideaki Wakamatsu:
Diels-Alder Reaction of N-Benzyl-3-nitro-2(1H)-quinolone ...................................... 55
Satomi Ihara, Keiko Sasaki, Yumiko Akiho, Harumi Shimoda and Fumihiyo Yoshizaki:
Application of Capillary Electrophoresis to Analysis of Aconitine Alkaloids .............. 61
Takeshi Kumagai, Eri Shirosawa, Hiromu Tsutsumi, Keiichi Ebina, and Katsushi Yokota:
Effects of Endocrine Disrupting Chemicals on Cellular Function
in Mouse Peritoneal Macrophages ........................................................................ 67
Hiromu Tsutsumi, Yuichi Mihara, and Katsushi Yokota:
Comparison between Two Types of the Improved Desiccator System
in the Formaldehyde Removal Effects ........................................... 73

Hiromu Tsutsumi, Takeshi Kumagai, Keiichi Ebina and Katsushi Yokota:
Effect of Asp-hemolysin related Synthetic Peptide P-21 on
Lipopolysaccharide-induced Nitric Oxide Production in Macrophages .................. 79

Yoshio Okawa, Makiko Kobayashi, Takayuki Yoshida and Masuko Suzuki:
Protective Effects of Yeast Mannan against Pseudomonas aeruginosa
Infection in Mice ............................................................................. 85

Naoki Yoshikawa, Yukihiro Ueno, Ayako Ogasawara, Toshihiko Watanabe,
Takeshi Mikami and Tatsuji Matsumoto:
Analysis of Transformation System in Candida albicans Regulated by pH ........... 91

Yoshinori Ochiai, Rie Komai, Kunio Itoh, Eiichi Sakurai and Yorihisa Tanaka:
Correlation between monoamine oxidase mRNA expression and enzymatic activity
in rat tissues ................................................................................. 97

Tadahiro Yoshida, Ryo Murata, Susumu Suzuki, Yoshitomo Oka, Kunio Itoh and Yorihisa Tanaka:
Intestinal Absorption of Cyclosporin A in Diabetic Model Rats .......................... 107

Koji Uwai, Marie Tani, Takashi Chiba, Yoshiro Hamaya and Mitsuhiro Takeshita:
Photostability of Propranolol ................................................................ 117

Shigeki Sugawara, Masahiro Hosono, Yukiko Ogawa, Satoko Sasaki and Kazuo Nitta:
Search of molecules associating with Gβ3 in glycosphingolipid-enriched
microdomain .................................................................................. 125

Akihiko Yonezawa, Masaru Yoshizumi, Manabu Ebiko, Yukio Kimura and Shinobu Sakurada:
Penile erection and ejaculation induced by the serotonin releasers in male rats ....... 133

Airi Ito, Ryoko Ito, Satoko Kajikawa, Maya Naruse, Ryoko Nomura, Yukiko Ujiie,
Kanako Watanabe, Keiko Ohwada, Kaori Okuyama, Motoaki Takayanagi
and Isao Ohno:
Psychological stress exacerbates airway inflammation in a murine model
of allergic asthma ........................................................................ 143

Reika Arakawa, Yoshinori Utida, Yumi Takahashi, Yoshikazu Yamamoto, Mami Takeda,
Kanako Watanabe, Takeshi Sugaya, Kaori Okuyama, Keiko Ohwada,
Motoaki Takayanagi and Isao Ohno:
The role of angiotensin II type 1a receptor in allergen- induced airway inflammation. ... 151

Masahiro Kataoka:
Calculations of C-C Bond Lengths , Electronic Spectra and Magnetic
Susceptibilities of Syn and Anti Doublebent[5]Phenylene ................................ 161

Abstracts of Published Papers .................................................................. 165
Titles of Papers Presented at Scientific Meeting ........................................... 187
